IntelliBridge

MISSION
ACCELERATED

Don't just adapt to the coming AI disruption. Lead it.

Artificial Intelligence is not just in the future of the 4th industrial revolution; it's today. From automating basic knowledge-based tasks to building entire software solutions - AI is reshaping industries. With IntelliBridge's TorqAgents, you get a game-changing solution that empowers you Agency to amplify - efficiency, accuracy, and Returns on Investment (ROI).

About TorqAgents

IntelliBridge's TorqAgents leverage cutting-edge language models and machine learning technologies in a low code, intuitive interface to redefine what's possible for your team to accomplish, by overcoming the main challenges with AI adoption and usage.
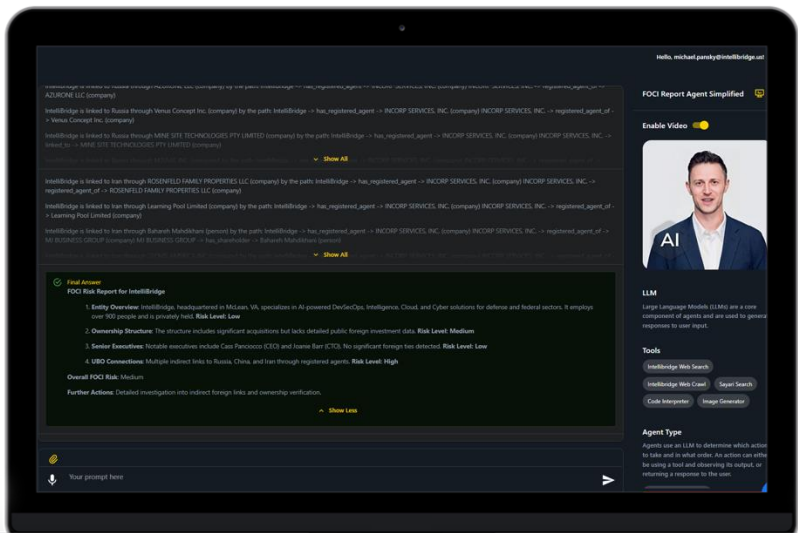

Key Differentiators

❑ **Access to our data, and yours (Data):** TorqAgents can tap into our internal TorqData repositories along with your internal knowledge repositories, providing you with tailored information that are not available to the general public.

❑ **Model Flexibility (LLMs):** With TorqAgents, you're not tied to a single AI vendor. As LLM models evolve, we provide users the freedom to switch between providers, ensuring you always have access to the best technology.

❑ **Reusable Agent, Chains, Orchestration Templates (Agents):** Save time and maintain consistency with repeatable and shareable templates. These are designed to streamline your workflow and can be easily customized for various tasks.

❑ **Customized Integrations (Tools)**: TorqAgents are built to work seamlessly with the tools you use every day, including PowerPoint, Jira, Sharepoint, and more. This integration allows for a smoother workflow and reduces the need to switch between different applications.

❑ **Infrastructure and Deployment (Platform):** Leverage our Cloud SaaS, use our SIPR Air-Gapped solution, or deploy in your environment with our containerized app. Additionally, with REST APIs for everything in TorqCloud, you can be sure that integrating intelligence into your workflow, is as simple as curl request.

Leverage cutting-edge large language models and machine learning technologies in a low code, intuitive interface to redefine what's possible in the automation and analysis of vast amounts of data, identifying patterns, trends, and insights

AI Misconceptions	TorqAgents
AI is too complex to implement	Our plug-and-play low-code solution integrates seamlessly with existing tools/systems (i.e.. JIRA, SharePoint, Etc.) with APIs to power your solutions in minutes.
AI can't handle creative or complex tasks	TorqAgents are designed to adapt and assist in complex decision-making processes with agent orchestration.
Data security risks outweigh the benefits	TorqAgents are available via SaaS, Commercial and Government Azure and AWS, or via completely air gapped deployment in your environment.
AI systems "Hallucinate" or biased	Our flexible interface allows fine grain controls of creativity and exactness of prompting while allowing users to provide few shot examples to each AI Agent - improving outputs on their data, their processes, and their tone.in responses.
AI is expensive	We offer flexible product solutions or services to support our customer budget and policy constraints

i^x Your Employees

Federal Agencies are grappling with the need to keep pace of innovation while balancing appropriate authorities, policies, and commercial solutions presented. TorqAgents offer a new way to dramatically improve productivity, allowing your teams to innovate exponentially (i^x) in the same amount of time; focusing on strategy, customer relationship, and other value-added tasks.
